PROFILE

Software engineer with a computer-vision & AI engineering degree. Three years of industry experience across full-stack development (Angular, Django) and applied machine learning — from steel-coil defect detection to LLM assistants.

EXPERIENCE

R&I Developer · Bassetti Group Sep 2024 – Present
Fixed-term contract · Grenoble, France

- Develop and maintain R&I web applications end to end, with Angular front ends and Django back ends.
- Build TxBot, an LLM-powered assistant (LangChain) that answers questions over internal knowledge and TEEXMA data.
- Keep extending REMIND's machine-learning features — prediction, anomaly detection, clustering — on materials data.
- Containerise services with Docker; write unit tests and technical documentation.

Angular · TypeScript · Python · Django · LangChain · MongoDB · MySQL · Docker · Git

R&I Developer · Bassetti Group Feb 2024 – Aug 2024
End-of-studies internship · Grenoble, France

- Built REMIND, a web app that imports materials databases (Excel, CSV, TEEXMA) and runs ML workflows on them: prediction, anomaly detection and clustering.
- Delivered interactive statistical views — histograms, correlation matrices, box plots — in the Angular front end.
- Modelled and maintained MongoDB data; wrote unit tests and technical documentation.

Angular · TypeScript · Django · Python · scikit-learn · MongoDB · Git

Computer Vision Engineer · ArcelorMittal France Mar 2023 – Aug 2023
Internship · Uckange, France

- Built CoilCheck, an automated pipeline that detects surface defects on steel coils before packaging.
- Benchmarked unsupervised anomaly-detection models (Anomalib) and trained TensorFlow models; managed datasets on Picsellia.
- Ran a technology watch on industrial computer-vision tooling.

Python · TensorFlow · PyTorch · Anomalib · Picsellia · scikit-learn · Linux · Git

SELECTED PROJECTS

Roll Power · GMTK Game Jam 2022 2022
Rolling is your superpower. Push the bombs away before they blow. Unity · C# · FL Studio

ZKTris Unforgivable · Personal project 2022
A Tetris remake where holes can never be cleared. Unity · C# · FL Studio

Portfolio · Personal project 2026
Bilingual, prerendered, and generated from a single content file. Angular · TypeScript · SCSS · SSG

SKILLS

Languages

Python, TypeScript, C#, SQL,
HTML & CSS

Front-end

Angular, SCSS, Responsive UI

Back-end & data

Django, MongoDB, MySQL,
Docker

AI & computer vision

scikit-learn, PyTorch,
TensorFlow, LangChain,
Anomalib

Tools

Git, Linux, Unity, FL Studio

EDUCATION

**Engineering degree (M.Eng.)
— Computer Vision & AI**
Télécom Physique Strasbourg
Sep 2020 – Sep 2024

**Preparatory classes (CPGE)
— Maths & Physics**
CPGE Ibn Ghazi, Rabat
Sep 2018 – Jul 2020

LANGUAGES

French	Fluent
English	Professional
Hausa	Native

INTERESTS

Volleyball · Boulderling ·
Chess · Piano · Football ·
Reading
